

# SANDRINGHAM GOLF CLUB

## STABLEFORD INSTRUCTIONS

To calculate how many stableford points you score, you need to work out your awarded shots on each hole.

Whatever your handicap, you should be aiming to score a minimum of 36 points (2 points per hole x 18 holes).

A player's score is based on points awarded by comparing the player's number of nett strokes made on the hole to the "PAR" of each hole.

If nett strokes = Par you get 2 points.

If nett strokes is 1 less than Par you get 3 points, 2 less you get 4 points, etc.

If nett strokes is 1 more than Par you get 1 point, and zero points if 2 or more above Par.

The gross strokes must be shown on the scorecard for holes where points are scored.

A player should pick up their ball once they cannot score points on a hole.

The competition is won by the player who completes all holes with the most points.

### EXAMPLES

Player with a handicap of 25 deducts 2 strokes from the gross strokes on holes indexed 1-7 to arrive at the nett strokes.

Player with a handicap of 36 deducts 2 strokes from the gross strokes on every hole to arrive at the nett strokes.

Player with a handicap of 45 deducts 3 strokes from the gross strokes on holes indexed 1-9 and 2 strokes from the gross strokes on holes indexed 10-18 to arrive at the nett strokes.
